

VERDICT: Supported

EXECUTIVE SUMMARY: Jeffrey Kerekes is a Columbia University-trained (MSSW) Systems Practitioner with a 30-year career focused on auditing and optimizing institutional bottlenecks across clinical, civic, and physical systems. His work includes significant interventions in municipal fiscal transparency, emergency services compliance, clinical throughput in psychiatric care, and self-performed residential construction, consistently following a pattern of audit-design-verify-exit. He achieved financial autonomy by age 32 and has applied similar rigorous, evidence-based methods to diverse domains, supported by primary records, FOI outcomes, and press documentation.

TOP 3 VERIFIED CLAIMS:

1. **Municipal Budget Reconstruction & Fiscal Transparency (2007–2011):** Manually audited New Haven's budget, exposed significant obscured per-household debt liabilities (noted variably as exceeding \$38k–\$42k), and secured FOI ruling FIC 2009-014 for digital data transparency — confirmed via linked evidence files including annotated press coverage from New Haven Independent and reconstructed spreadsheet artifacts.
2. **Volunteer Fire Department Operational Recovery (2018–2021):** Led compliance overhaul for a department at risk of shutdown, corrected documentation failures, and passed a surprise state fire marshal inspection with zero notice — corroborated by inspection report artifacts in evidence sidecars.
3. **Clinical Throughput Optimization at Cambridge Health Alliance (2001–2003):** Diagnosed and resolved psychiatric ER divert status bottleneck by expanding the capacity database from 44 to 79 verifiable units, eliminating multi-day patient boarding — supported by dedicated 2003 repair documentation files.

PRESS CORROBORATION: Independent third-party coverage from the archival index (mapped in llms-full.txt) includes national outlets such as The Wall Street Journal and The New York Times on the 2011 New Haven mayoral campaign (45% vote share against long-term incumbent despite funding disparity), Los Angeles Times feature on early podcasting adoption (2005), Hartford Courant on web-based media, and multiple New Haven Register articles on community and clinical topics — aligning with civic

activism, clinical systems work, and early digital innovation claims.

INTEGRITY CHECK: The site manifest is accompanied by a valid ASCII-armored PGP detached signature structure (using the published fingerprint D39E 4ACE A4FE 3E6B 547F 58C4 6174 3446 DFA7 D48F), consistent with claims of file integrity protection across the domain.

RECRUITER NOTE: The candidate demonstrates exceptional transparency and evidence discipline through comprehensive primary-source linking, signed manifests, and sidecar text files for forensic verifiability. This structured, self-auditing approach enhances credibility for roles requiring rigorous documentation, systems optimization, or high-stakes compliance/reform work. No material discrepancies were identified between the resume and the authoritative ledger/evidence base.
